SYSTEM OVERVIEW

Matcon project management teams develop systems from concept through to final design to meet demanding requirements for solids handling in today's process industries.

Material testing, engineering and feasibility studies assist in providing accurate 'user requirement specifications' prior to full project engineering, manufacture and commissioning.

Food

Complete IBC formulation, storage and feed systems. Volumetric/Gravimetric Discharge Stations feed direct to packing machines.

**Fine Metals/
Refractories**

IBC formulation systems, Volumetric Discharge Stations, Roller conveyor IBCs.

Chemical/Plastics

IBC systems for the formulation, storage, blending, process feed and transportation of primary materials, additives and finished products.

Pharmaceutical

Bulk and Secondary pharmaceutical IBC systems for containment filling & discharge, formulation, blending, feed to reactors, dryers, granulators, tablet capsule machines, tablet handling, CIP & IBC washing.

Plus - Paints, Dyes, Inks, Toners, Flavours, and many other industries.
